The beauty of timber

Timber windows and doors, unlike any other material, have a quality that can make any house look distinctive and feel warm and homely. As a company, similarly, Albion is different from other leading manufacturers of timber windows in our commitment to giving you the very best level of quality and a personal, hands-on craftsman service, at the right price.

In addition to a range of windows which include Flush Casement, Sliding Sash and Tilt and Turn, we also manufacture and offer a wide range of Entrance, French and Folding Sliding doors. Timber species offered include Pine, Meranti hardwood and the unmistakable Oak if you want that natural stained or oiled finish.

Uncompromising quality you can afford

Many people would choose timber for all of its distinctive benefits but simply believe it to be out of reach in terms of affordability. This was once true for most people because the leading national distributors were able to, and in fact still do, make considerable margins rather than offer lower, more competitive prices.

At Albion that's very different. Having set up our own manufacturing line we have cut out the middle man margin which enables us to produce competitive and affordable timber products.

Albion timber windows are not only beautiful – they are the very best quality and are surprisingly within the reach for everyone. We make our windows from the same quality of timber and materials, to the same specifications and in the same way as the market leaders. Many of the age-old problems associated with timber products have been eliminated through years of development and advances in manufacturing technology. Our windows will not warp, twist, stick or bow like their predecessors allowing them to last without redecoration for another 6-8 years following installation.

WINDOWS

Sliding sash windows

The Albion Vertical Sliding Sash is a faithful reproduction of the traditional English sash window. It is similar in proportion and dimensions making it a perfect replacement for your existing sash windows. Our specifically engineered profiling ensures a smooth and lasting operating action for the life of each and every window. All our sash windows come double glazed with a 24mm sealed unit benefitting from the latest in glass technology and manufacturing process.

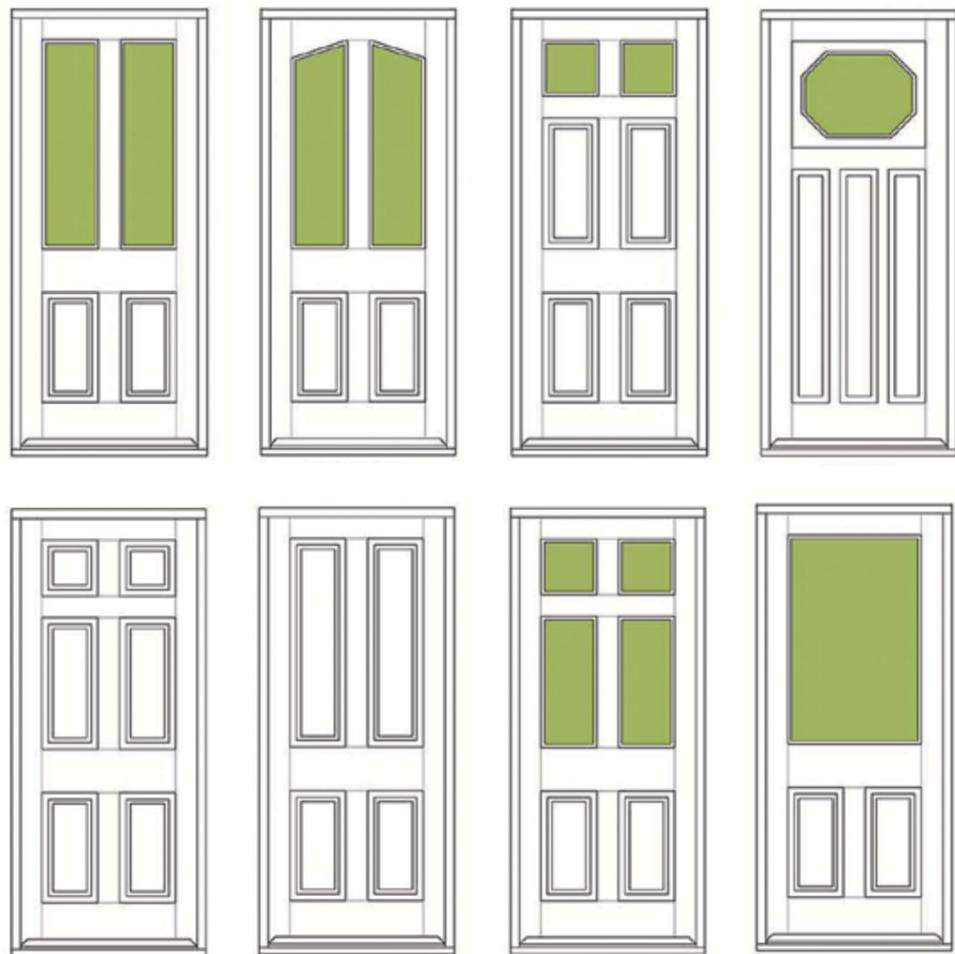

Flush casement windows

These are our most popular type of timber replacement window. Their main characteristic is the casement opens that close into the frame and finish flush with the frame face. This feature clearly identifies the class and distinctive appearance of these timeless windows. They all come with a 4 point YALE bi-directional multi-point lock with a key locking handle as standard. Handles are available in a choice of colours and styles including a black period monkey tail.

WINDOWS

WINDOWS

Traditional values and real service

We prefer to talk to you, get to know you a little and understand what you want to achieve. From there we produce detailed CAD (Computer Aided design) drawings to demonstrate your individual requirements. We keep you informed throughout the manufacturing process and we continue to look after you and your new windows beyond installation. Attention to detail is standard with every aspect of our service and not just with our windows and doors.

Come and visit our showroom and see for yourself why the right choice for your timber windows is Albion.

DOORS

French doors

These distinctive, double opening doors can be installed to any opening to your home and come in either inwards or outwards opening to make the best use of the space available. Options available include complementary side panelling and top lights. Additional specifications offered include Georgian Bars, Leaded Lights and Stained Glass. All doors come with a secure insurance approved multi-point locking system and a range of complementary furniture to match your choice of door colour.

DOORS

Folding, sliding doors

Made from the finest resilient hardwoods including Idigbo, Sapele and the unmistakable Oak that not only visually look stunning but are strong and flexible enough for runs of up to 15 metres wide and up to 3 metres high. Folding, sliding doors or Bi-fold doors as they are sometimes known, are extremely versatile being suited to many applications internally and externally. Available in any RAL, BS or Farrow and Ball colour along with a range of stained finishes for that attractive period look. Fully routed in handles and hinges ensure no collision worries with traffic doors allowing that slim look when stacked back in the open position. These doors are on full display in our showroom.

DOORS

Front entrance doors

A wide range of 12 distinctive styles are available for you to choose between. We can produce your door to any size and paint it in any one of over 200 individual colours or 10 hand-stained finishes. For the more adventurous we can also produce dual-colour designs internally and externally. All doors are available in Pine Meranti hardwood and the elegant and distinctive Oak finish.

DOORS

Our artisan product range

We make a wide variety of window and door styles to suit your home. All our products are made-to-measure using the very latest techniques and machining technologies to look beautiful and operate smoothly for many years to come.

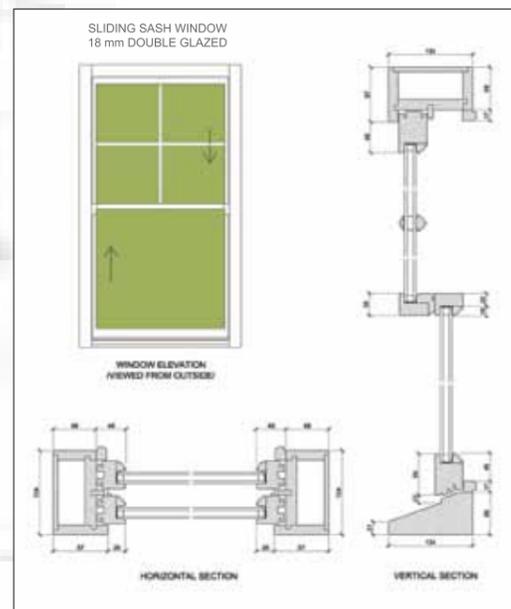

Conservatories and orangeries

When it comes to designing and building conservatories we offer a full and complete service from design consultation, planning approval through to custom build and bespoke finishing. We can even arrange for a team of professional interior design and decorators to add that final touch to the completed conservatory or orangery. Additional services to compliment your new build are stone patios, landscaping and garden remodelling.

CONSERVATORIES

The specification and design process

Albion gives you the comfort and dependability of a very personalised service. We believe in giving our customers an unrivalled degree of hands-on service that you simply cannot get through bigger online retailers. Put simply, we give you complete peace of mind throughout. The first stage of buying your timber windows involves a personal consultation. We explore options with you, ensure that we have a clear understanding of precisely what you aim to achieve, before providing you with an accurate quotation. At the second stage of the process, an in-house Albion design technician produces detailed CAD projections (Computer Aided Drawings) so you can see exactly how each window will look on your property. Nothing is manufactured until you are completely happy with every aspect of the design proposal – we are happy when you are happy. If you want everything completed by a certain date, then provided it is achievable, we will deliver.

Craftsmanship

Timber is not an easy material to work with and it takes a tremendous amount of expertise and experience to know how to get the best from it. Naturally our manufacturing process is complex and requires a state-of-the-art factory facility to achieve the quality and longevity Albion is known for. One of the main features of our windows and doors is their exceptional durability due to our multi-layered timber manufacturing process, which has taken many years to develop and perfect. Multiple layers are glued together with their grains running in opposite directions. The end result is a piece of timber that looks in every way like it has been cut from one piece of wood but without all the inherent warping and twisting you get when making them from a solid timber section. Think of it as high-tech wood engineering for long-lasting windows and doors. We encourage you to benchmark what we offer against our competitors. Local carpenters and joiners can provide you with reasonably priced timber products but they will not benefit from our manufacturing technology and the advantages that come with it. Also, in most cases, the product will be delivered without glazing or paint finishing. Our products come completely factory finished and are even backed by an industry approved quality assurance scheme. To put it simply, we are experts in windows and doors, we give you the complete package and few companies can rival our offering.

Installation

It may or may not surprise you to know that many window and door replacement companies, including some of the large nationals, sub-contract the installation of their products to self-employed contractors, in other words, individual tradespeople who are not familiar with you or the company. Most are operated on a schedule of rates or pricing, often resulting in poor quality of workmanship when installations are rushed. When we say we fit your windows, we mean precisely that. Albion windows and doors are fitted by our own dedicated team of approved, qualified fitters. Every installation includes a full property survey followed by a timely and agreeable installation date within 7-9 weeks of you placing the order. Every aspect of the work is monitored by our Contracts Manager to guarantee your satisfaction at the end of the project. Best of all, as with the manufacturing of our products, all our workmanship is underpinned by an insurance-backed quality guarantee through the Double Glazing and Conservatory Ombudsman Scheme – the DGCOS.

ISO 14001

We value all our customers and we know from experience, that our satisfied customers always come back to us and frequently recommend us to other people. The service you receive from Albion, post-installation and well beyond, will be as exemplary as it was on day one. It is something we pride ourselves on and that helps us to reinforce our complete commitment to making the finest quality windows and doors for a growing list of very happy, long-term customers.
