Who we are

From our home in Cheshire, we've been proudly supplying hand-crafted wooden windows and doors to the trade since 1985. With decades of experience, our time served joiners craft each piece with passion and precision, knowing that our award-winning windows and doors are being installed in homes across Great Britain.

In recent years, we've seen a resurgence in the popularity of wooden windows and doors. More and more homeowners are recognising that timber is the superior choice for families who value sustainability, durability, energy efficiency, and long-lasting performance.

Scientific advances by the modified timber manufacturer Accoya have enhanced what can be achieved using timber. Accoya uses wood from fast-growing, FSC-certified forests, enhancing it through a unique acetylation process.

This process prevents the timber from absorbing water, dramatically improving its stability, durability, and energy efficiency—even in the face of Britain's ever-changing weather. Say goodbye to the warping, swelling, and distortion that often affects traditional timber products.

Not only does Accoya's timber offer superior performance, but it also stands as the most sustainable option on the market. Its wood comes from an infinite supply of responsibly managed forests, making it a far greener choice than hardwood, uPVC, or aluminium alternatives.

This is why we use Accoya as standard in our Signature range of hand-crafted windows and doors—because it offers the very best in sustainability, performance, and beauty.

Our craft

You're in safe hands

We've been proudly supplying hand-crafted wooden windows and doors since 1985. It all started on this little saw, which we still hold in our workshop today as a reminder of where we came from.

We've come a long way, spending the last 40 years improving our joinery techniques, materials and machinery, whilst still honouring our traditions and craft.

This means after our products have been installed, homeowners can sit back and relax safe in the knowledge that their new windows and doors are the result of 40 years of hand-crafting excellence.

Our beginnings

Glyngary was built on family values thorough the 80's, 90's and 00's by our founder, Colin Yates. He retired in 2017 and since then the business has been led by Colin's two sons Gary and Glyn, who have been involved in the family business since the 90's.

Today we operate from a 40,000 sq ft space in Cheshire. Our dedicated team includes time served joiners who've been part of our family for decades, as well as younger enthusiastic joiners who go through our testing apprenticeship scheme.

Honouring Craft.

Delivering Excellence.

Why timber

Sustainability

Did you know that 43% of uPVC is derived from petroleum, a finite resource that contributes significantly to the world's carbon dioxide emissions?

In the face of a climate emergency, the need for sustainable, renewable, and fully recyclable building materials has never been more urgent.

By choosing windows and doors crafted from FSC-certified timber, you're supporting responsibly managed forests that maintain a constant, renewable cycle of supply. Trees naturally absorb around 25% of the carbon emissions produced by human activity. However, as they age, their ability to capture carbon decreases, so at this point, they're transformed into Accoya, making room for new, fast-growing trees that can take up the carbon-absorbing role.

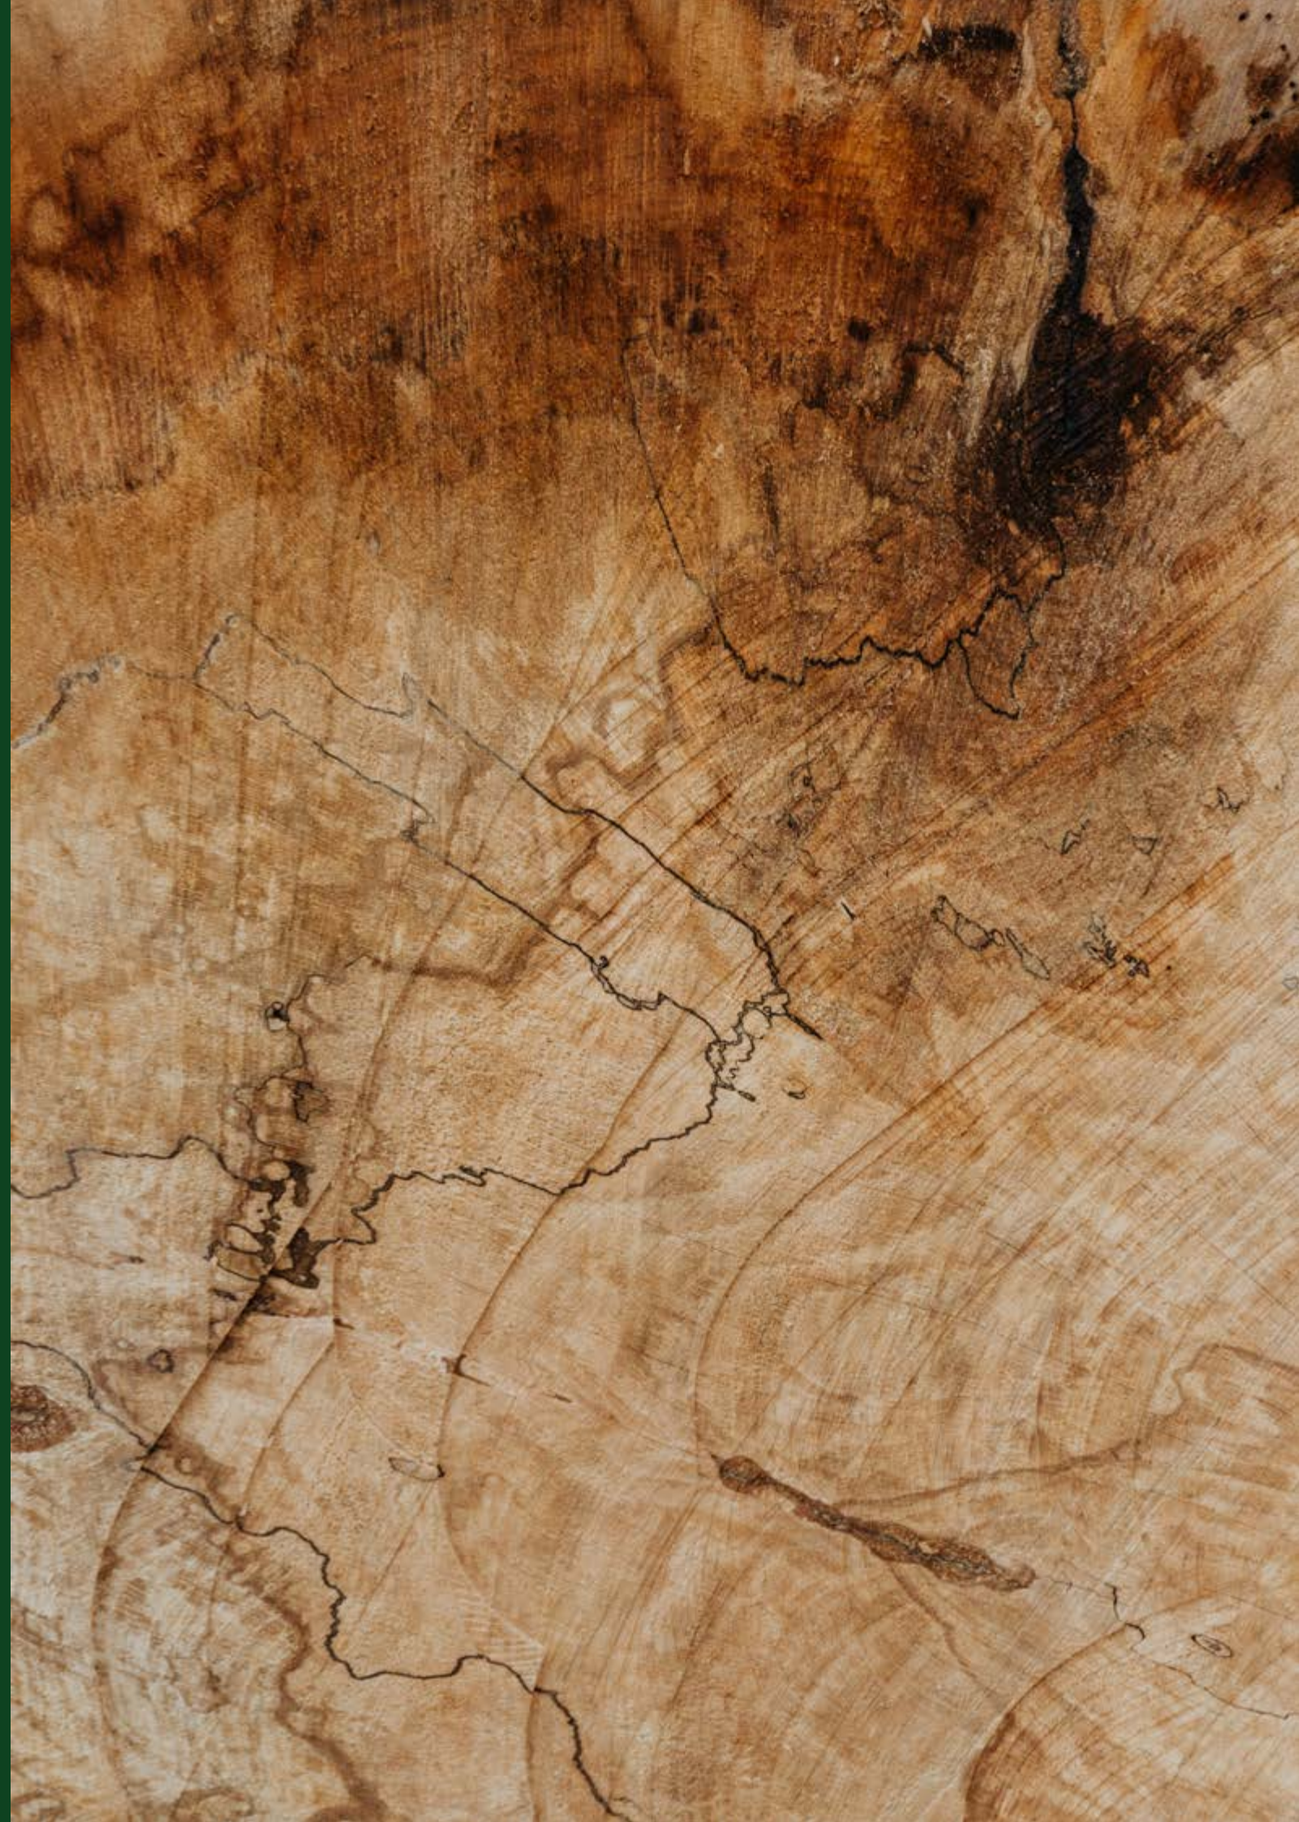
Accoya is not just an environmentally friendly choice—it's a groundbreaking one. Accredited by the FSC®, it's the only construction material worldwide to earn Cradle to Cradle (C2C) Platinum certification® for Material Health.

With its low carbon footprint, choosing Accoya windows and doors means your family is actively helping to reduce carbon emissions, contributing to a healthier planet.

We are committed to sustainability in every step of our process. In 2016, we invested in a biomass boiler heating system, which heats our workshop and paint drying booths using our own timber offcuts rather than gas. This is just one example of how we're reducing our environmental impact.

With a lifespan of over 70 years and fully recyclable at the end of their lifecycle, our hand-crafted windows and doors offer an unparalleled level of sustainability.

From the sourcing of materials to production and delivery, they are the ideal choice for families looking to make a positive difference in the face of today's environmental challenges.



Longevity

Hand-crafted wooden windows and doors are the result of skilled craftsmanship, not mass production. Each piece is meticulously created by professional, time-served joiners.

Every mortice and tenon joint, coat of paint, and decorative moulding requires time and expertise to perfect. As a result, the initial cost of wooden windows and doors may be higher than uPVC or aluminium alternatives.

However, the true value of our windows and doors lies in their longevity. With a life expectancy of over 70 years, they far outlast alternatives like uPVC, which typically last just 15–20 years.

Unlike uPVC or aluminium, which can start to look worn out over time with no easy way to refresh them, our timber windows and doors can be repainted to look like new, year after year.

As trends evolve, children grow up, and homes are redecorated, your windows and doors can evolve with you.

Repainting not only restores your windows and doors to their original beauty but also allows them to blend seamlessly with new decor styles.

From the moment they're installed, our Accoya high-performance windows and doors start paying for themselves—delivering long-lasting value, timeless appeal, and unmatched durability.

Durability

Our windows and doors offer outstanding resistance to insect attacks and damage. Thanks to Accoya's unique properties, it's indigestible to a wide range of pests, including termites, creating a natural, highly effective barrier against infestations.

Plus, Accoya's exceptional stability means there's minimal risk of issues during assembly, installation, or in the years to come.

Accoya sets a new standard for timber reliability. After undergoing the advanced acetylation process, it is rigorously checked and trusted not to swell, shrink, or distort. With only minimal movement, it remains highly durable, enduring the harshest climates for an impressive lifespan of 70+ years.

Our windows and doors are crafted to be structurally sound, using traditional joinery techniques honed over four decades.

Combined with our dedication to sourcing only the finest materials, we create hand-finished products that are designed to perform seamlessly through both winter and summer, year after year.

Energy efficiency

With rising costs and a growing energy crisis, energy efficiency has become a top priority for homeowners choosing new windows and doors.

Whilst uPVC and aluminium systems are constantly being modified and adapted just to meet the UK's increasingly stringent energy performance regulations, timber stands apart as a natural insulator, boasting low thermal transmittance and helping to retain warmth whilst keeping the cold out.

By combining Accoya timber with high-performance, energy-efficient glass, our Signature range achieves industry-leading U-values. Our double-glazed windows and doors deliver a U-value of 1.2 W/m²K, outperforming current UK regulations by 15%.

With triple glazing, the U-value can be as low as 0.68 W/m2k – an impressive 52% better than current standards. All our U-value testing and declarations adhere to BR442 guidelines and the EN 14351-1 standard, ensuring exceptional energy performance.

Our windows

Flush window

Our flush windows are hand crafted to perfection, offering a traditional look outside the property with the window sash finishing flush with the frame.

Flush windows are available with a wide range of hardware options using either traditional peg stays or shoot bolt locking with friction hinges for enhanced security.

Stormproof window

Our stormproof windows offer double rebated protection against the outside elements, while presenting a more modern aesthetic.

Stormproof windows are available with a wide range of hardware options using either traditional peg stays or shootbolt locking with friction hinges for enhanced security.

Sash window

Our wooden sash windows boasting classic sash aesthetics with smooth long-lasting operation, high security and energy efficiency.

Sash windows are available using either a spiral balance mechanism or traditional lead weights where the sash weight is matched to the lead weight fitted in the side of the window. The lead weights are attached with a visible sash cord over an axle pully wheel, resulting in a completely frictionless and balanced motion of travel.

Our doors

Entrance door

Our high security entrance doors are available in a range of styles, catering for traditional and modern needs. We offer a range of glass options to compliment each design.

Using Maco multipoint door locks, Ultion 3* door cylinders and solid Accoya, our entrance doors are not only beautiful, but also safe and secure from unwanted intruders.

French door

Our high security French doors are available opening inwards or outwards, fitted with 2 fully functional multi point door locks and lever/lever handles. French doors are a great way to open a room, perfect for a bedroom with Juliet balcony.

Sliding door

Our high security sliding doors are available in a range of configurations, all operating effortlessly. Perfect for opening up dining areas or kitchens, sliding doors are the perfect way to maximise natural light into a family space.

Bi-fold door

Our high security bi-folding doors are a perfect practical solution for creating a wide-open spaces to maximise natural light and air. Folding inwards or outwards bi-folding doors are available in a range of configurations to work perfectly with the layout of your home.

Colours

Our paint comes from leading supplier Teknos, who have been producing it since 1948.

Teknos have been working in collaboration with Accoya since 2008, making it the perfect combination for a long-lasting finish.

All our windows and doors receive a three-coat professional spray finish before leaving our workshop. We can match any RAL or Farrow & Ball colour, and we can dual-colour, giving a different appearance inside and outside.

Opposite are some of our most popular colours:

Traffic White 9016	Signal White 9003	Pure White 9010	Cream 9001	Wheat Flower White 080 85 05
Soft Greige 060 80 10	Vanilla Cream 060 90 10	Light Apricot 010 90 10	Sunrose Yellow 090 90 60	Cold Pink 350 70 10
Peanut Butter 060 70 20	Reed Green 6013	Sand Grey 095 70 10	Agate Grey 7038	Silk Grey 7044
Pebble Grey 7032	Laurel Grey 120 70 05	Filigree Grey 120 70 20	Soap Grey 130 70 20	Matte Green Sage 130 60 10
Sage Green Grey 150 50 10	North Cape Grey 200 60 10	Grey Mouse 7005	Blackthorn Blue 240 40 10	Galenite Blue 230 30 10
Slate Grey 7015	Graphite Grey 7024	Anthracite Grey 7016	Graphite Black 9011	Jet Black 9005

Hardware

We are proud to offer two premium hardware ranges from UK based suppliers ‘Coastal Group’ and ‘From the Anvil’.

Using two ranges allows us to cover all hardware styles from modern to traditional. All our hardware is premium grade and boasts a 10-year guarantee.

From the Anvil®

From Llandrindod Wells, Wales ‘From The Anvil’ boast over twenty three years of experience.

Combining beauty with durability, expert Blacksmiths hand craft exquisite products by forging mild steel and hot forging brass to make one-of-a-kind ironmongery that will last a lifetime.This is our super premium grade hardware.

COASTAL

Born on the rugged shores of Cornwall back in 2003, Coastal Group is a family owned business that specialises in the design and manufacture of precision-made hardware solutions for external doors and windows.

Our complete hardware range can be browsed in our product guide.

Tailored products

Whilst our Signature range covers most scenarios and accounts for around 80% of the frames we sell, we can also craft completely bespoke timber windows and doors, tailor made to exact requirements.

Within our Tailored range, we can supply windows and doors that are:

- Made from a range of hardwoods in addition to Accoya
- Available with a stained finish, as well as a paint finish
- Arched, angled and shaped
- Ideal for conservation areas, where the exact shape and size of the frame and sash need to be matched
- Fitted with slimline windows, which are also popular in conservation areas –and sometimes essential to meet Conservation Officer's requirements
- Finished with bespoke hardware to your own specification

For bespoke projects, our expert team are able to guide our customers through every step, providing detailed drawings and technical support.

Find an installer

We are a supplier to the trade, and we don't install windows and doors. However, if you don't already have someone lined up, we would be delighted to recommend a Glyngary approved installer to you.

We trust our approved installers to treat our hand-crafted products with the love and care they deserve, ensuring a beautiful installation completed professionally.

Contact us, and we can recommend someone who covers your area.
